

Med-Stop campuses Enhanced Visitation Policy

Essential Visitation Only

(Effective January 6, 2021)

Patients may not have visitors accompany them into the Med-Stop, unless as an essential visitor*.

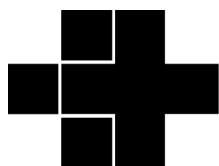

Upon registration, patients will wait in their vehicle until a treatment room is available.

- **Essential visitors*** include those who are visiting/accompanying the following patients:
 - Minor patients under the age of 18
 - Patients who need a healthcare decision maker
 - Patients who are developmentally disabled that require full-time care
- **No visitors are permitted to accompany patients** into a Med-Stop (unless an essential visitor as described above)

It is mandatory that a hospital-approved mask be properly worn at all times while at a Houston Healthcare facility. Non-charcoal filtered vented masks are prohibited.

Any patient, patron or employee who arrives without an approved mask will be provided a surgical mask to replace or cover over any mask that does not meet the appropriate guidelines.

Visitors with cough, fever, shortness of breath or other flu-like symptoms will not be allowed entry. Greeters at public entrances will continue to ask basic screening questions and temperature monitoring, guiding those seeking treatment to the appropriate location while assisting essential visitors as needed. Patients who require help with mobility will be assisted by a staff member. Patients who require help with communication will be provided Stratus video translation services.
